Statement of the Problem: Diabetes Type 2 and Glaucoma Healing.

As most of us are aware Type 2 diabetes can be controlled and cured completely with the diet, workouts (yoga), effective stress management and other healing methods.

Glaucoma Healing-Without any medicines

We had 1 patient with high blood pressure and due to which he lost one eye sight completely and the other one he lost around 70% of the eye sight. We started giving this patient Mexican healing and distant Reiki Healing within few days we could see that 3 of his dead retina cells activated. We took the patient to the same hospital and conducted his eye test after 1 week of healing; there were changes in his eye sight. The pattern report showed us 3 active retina cells (which was dead in the earlier report taken). The lab technician of the hospital confirmed that there was an improvement of sight in the new report. We took the patient to meet his Ophthalmologist but ophthalmologist gave us negative reply saying "as per medical science the patient can't get back sight and ophthalmologist mentioned us that sight will deteriorate as the time progresses". We asked the ophthalmologist to check the sight improvement situations with the patient and patient replied saying he has slight improvement in his eye sight. Moreover, he was feeling tingling sensation when we were passing the Reiki Distant Healing energy to his eyes. This could be a miracle and an experiment beyond science. We are still working with lot of research in this field. According to medical science, there is no cure for Type1 Diabetes, Low Blood Pressure and many other diseases. However, we have brought lot of patients out of these diseases using powerful ancient healing techniques.

Type 2 Diabetes Patients Healing - 5 days distant healing result

Some people are suffering from diabetes because of obesity and some are suffering due to many psychological reason. Unless we heal their psychological problems we can't bring their glucose level. In Reiki healing methods, we can easily heal patients problems related to the brain by healing those typical hormones. We have seen patients going to trance state and feeling calmness in their mind.

I had 2 Diabetes patients from Dubai approached me for a Reiki Distant Healing. The first case was Insulin dependent obese lady aged 45 years and the second one was her husband aged 50 who was having lot of work and travel related stress and anxiety related case. We started giving them Reiki Distant Healing from India to these 2 patients. Before starting REIKI treatment her fasting blood glucose level was 217 mg/Dl within 5 days of Reiki Distant healing her FB glucose level went down to 130 mg/Dl. There was no change in diet or workout. We managed to remove her fat and energize Pancreas.

The second case her husband has not done any changes in work out or diet. We managed to heal his stress hormones and pancreas. His initial FB glucose level before initiating reiki treatment was 220 mg/Dl and it came down to 140 mg/Dl within 5 days of completing treatment.

More importantly, we wanted to high light here that these 2 patients had their PPBS (postprandial) rating was 450 mg/dl and after 5 days of reiki distant healing we could able to bring it back to 155 mg/dl just by healing or burning their excess fat in obesity case and healing stress hormones in other case. We have burn 4 Kgs of fat in one month duration. There was no food control or work out done by the patient during our treatment. Visit our website to www.healtheworld.in to watch our testimonials and healing therapies.

Statement of the Problem: Diabetes Type 2 Insulin Dependent

As most of us are aware Type 2 diabetes can be controlled and cured completely with the diet, workouts (yoga), effective stress management and other healing methods. Testimonial of one of my patient aged 70 years, male suffering from diabetes from more than 12 years and he was taking 3 insulin doses per day.

He has completed Reiki Master Degree through some Reiki Master in India. He came to be with the problem that he is not able to feel the energy while doing his self-healing. Moreover, he was suffering major health problems like (Insulin dependent diabetes for nearly 12 years, insomnia, constipation, stomach heaviness, etc.). I gave him Reiki Level 1 attunement a month back.

On 25th July he has taken his random glucose reading. The random glucose level was 575 mg/dl.

On July 27th I have given him Usui Reiki Level 2, 3 Attunement, Karuna Reiki Attunement and Mexican Healing attunement (Guru Poornima Day). Immediately after the attunement we checked his random glucose level it came down to 383 mg/Dl.

Results after 1 Mexican Healing

On 28th July evening, I conducted Mexican healing training class to my patient along with others. I took his random glucose level before giving him Mexican healing and it was 344 mg/Dl. After 1 Mexican healing his glucose came down to 260 mg/Dl. All the people who attended the training class were astonished with the power of Mexican healing.

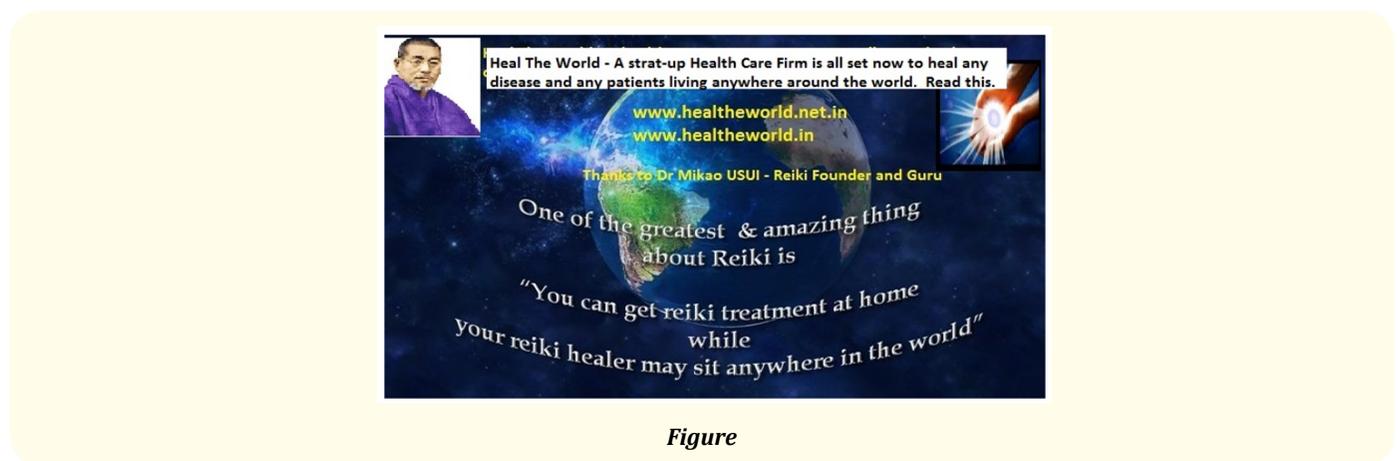

To summarize in 3 days, using attunement (Reiki and Mexican attunement) and with 1 Mexican healing, his glucose level came down from 575 mg/dL to 260 mg/DL. What is the percentage in drop down? 54.8%. Is it be possible to bring this much of level down in 3 days of taking any insulin?

Please note that there is no change in his food/diet or workouts. Also note the difference between the readings after attunement and after healing.

We are all made up of energy and it flows though the energy centers (chakra). We can't necessarily see energy, but we can feel the energy. When our energy centers becomes weak, diseases related to corresponding energy centers will pop up.

For Diabetes, there is energy center called "Solar Plexus" (Also called as Manipura Chakra). All diabetic patients will have low energy in their solar plexus energy. If you energize this energy center you will see the drastic reduction in your glucose level. You do not need to go for a pancreas transplant or tablets/insulin to treat your diabetes.

It is all in the energy. Learn from your Reiki master or healers to energize all your weaker organs or energy centers.
